

Aspen Evergreen™ Lower Spine Braces

The Aspen Evergreen line of inelastic braces offers a low profile design with proven performance and quality. As an adjunct treatment to current therapy, Evergreen braces provide a non-invasive, non-narcotic option for patients suffering from low back pain. These braces deliver an increased level of compression and trunk stability to support overtaxed muscles that spasm.

One Size Adjustable

Comfortably fits waists ranging from 28 to 54 inches and up to 64 inches with the extension panel. Simple pull-through sizing mechanism offers multiple sizes in one brace, enabling each brace to comfortably fit various patient shapes and sizes. One size adjustable means the correct size is always on hand, minimizing inventory requirements and significantly reducing costs.

Aspen Pain Therapy Braces Proven Effective in Promoting Trunk Stability

Research shows that inelastic braces are significantly more effective at improving trunk stability than elastic braces,^{1,2,3} a key factor in relieving muscle spasms which can cause pain. Increased trunk stability reduces the load on overtaxed muscles,⁴ so tightened and fatigued muscles can relax. Aspen lower spine braces are inelastic by design, backed by years of innovative research and development.

The Aspen Advantage Symbol

An Innovative Feature Available only from Aspen

One Size Adjustable

Pull-through sizing mechanism allows for quick and easy adjustment, without the use of tools.

Low Profile for Comfort

Evergreen braces are comfortable for extended wear and can easily be worn under clothing.

Integrated Anterior Panels

Anterior panels overlap to provide enhanced midline support. Featuring Aspen's innovative FlexTabs™, these panels disperse pressure and naturally conform to the anatomy for added comfort.

Easy Access for Modification

All structural components are easily removed and can be heat molded, bent or trimmed to accommodate individual patient conditions.

Custom Support

When tightening, the firm but flexible back panel naturally conforms to the patient's lordosis to provide added structural support.

Evergreen 621 SI Belt

The SlickTrack™ tightening system of the Evergreen 621 SI Belt provides sacral stabilization in a lightweight and low-profile design.
