VRTX CTLSO

The VRTX CTLSO is a groundbreaking solution that effectively caters to the needs of both trauma patients and clinicians. This comprehensive off-the-shelf cervical to sacrum solution enhances the overall efficiency of hospital operations by its specially designed features such as a bi-valved TLSO and easy to adjust collar. By streamlining treatment to trauma patients, the VRTX CTLSO enables medical professionals to expedite patient care, ultimately translating to improved outcomes, while also serving as a crucial resource-saving tool. The VRTX CTLSO is versatile, modular, and elevates the standard of patient care.

VRTX TLSO
Ideal motion restriction for acute thoracolumbar spine trauma and post-operative patients. Code L0464 approved

VRTX CTLSO
Upgrade Kit
For multilevel spinal support, step up the VRTX TLSO easily with the VRTX CTLSO upgrade kit.
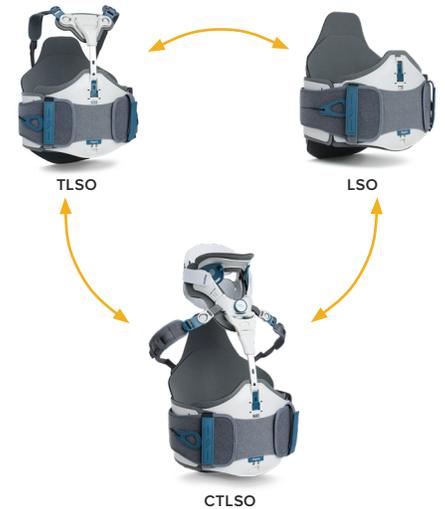

Direct customizable compression and increased trunk stability.

TLSO LSO

CTLSO

Optimal Motion Restriction
Underarm straps for optimal patient motion stabilization.

Two Piece Design
Simplified two-piece bivalved design for easier patient re-application.

Modularity In Treatment
The VRTX CTLSO can be stepped down to a TLSO or LSO based on the patient's needs.

VRTX Collar
All features found on the VRTX collar have been seamlessly integrated to use with the VRTX CTLSO.

Limit Logrolling
Specialized anterior tightening and adjustments allows for more efficient clinician application.
