

Aspen Peak Scoliosis Bracing System™

CODE L1005 APPROVED

The Peak Scoliosis Bracing System helps to provide relief of the symptoms associated with Adult Scoliosis. This Active Influence system uses a combination of compression and support to promote better alignment, improve posture and restore a more natural center of gravity.

Designed for Unique Patient Needs

Multiple configuration options give providers the ability to customize a patient's treatment. With this modular design, providers are able to assemble the right brace for each patient.

MULTIPLE OPTIONS FROM ONE BRACE

CONFIGURATION KIT

Aspen Active Influence Braces are Designed to Promote a More Natural Alignment

Aspen's Active Influence line of braces are specifically designed to help patients suffering from chronic postural conditions. These innovative braces provide postural support with the goal of reducing symptoms¹ caused by an unbalanced body position. Aspen Active Influence braces also work to encourage symmetrical spinal loading, prompting a more natural center of gravity and a restoration of normal proprioception.

The Aspen Advantage Symbol
An Innovative Feature Available only from Aspen

SlickTrack™ Tightening System 
Features an independent upper and lower tightening mechanism, providing localized compression where needed.

Convenient Closure Handles 
Enhances ease of use when applying or removing the brace.

Enhanced Pulley System 
Reduces friction and makes it easy to control the level of compression regardless of patient's strength.

Adjustable Tension Straps

To optimize the angle from which tension is applied, the posterior tension strap can be placed anywhere along the attachment strips based on patient needs.

FOAM FOR COMFORT
RIGID MATERIAL FOR STABILITY

Reliable Structural Integrity 
Integrates vertical stays that provide stability and can be removed on smaller sizes for a low profile, comfortable fit.

Universal Strut Assembly

Can be adjusted or modified to accommodate patient's unique needs, then placed anywhere on the belt to optimize support.
